

Optional/Bonus ASSIGNMENT: Create a 'unique' HTML TABLE

Topic: **Web page containing a 'unique' HTML Table**

**Note: Each student's table and/or images must be unique. Do not share resources!*

This assignment is optional. Worth: 1%

Grading: **1%** of overall grade (minimum requirements met)

Extra 1% available for the Super challenge: 'exceptional work beyond min. requirements', including CSS to layout and style the page.

Topic: Any appropriate topic of your choice.

Description: Apply knowledge learned after completing Tutorial 6 "Working with Tables". Create a web page containing the requirements listed below. Each student must create their own unique assignment. No shared resources allowed, including images.

Minimum requirements: Content

Create a Web Page. The web page must have a proper doctype, head and body section.

- Include a keyword meta element in the head section.
- Include a comment in the head section containing your name and student number.
- Include a header and footer section on the web page.
- <header> - Include one header element (h1 or h2) describing the content of the page.
- <footer> - Include a copyright, year, {Programmed by YOUR NAME HERE!}

Include an HTML TABLE on this web page:

Minimum requirements for the table:

- A caption. The caption must be styled using CSS.
- At least 4 rows and 4 columns
- At least one image (Sized appropriated to fit the cell)
- At least one colspan OR one rowspan
- A <thead>, <tbody> and <tfoot> element. Include all three.

Additional 1% requirements: "Super Challenge"

- To achieve the additional 1% (overall 2% for this assignment), you must create something exceptional. Exceptional means adding content and additional CSS to style the page and table. Make it look 'pretty'!

Due: ON or BEFORE: FRIDAY, December 9th (midnight)
