module 15:

“Working with HTML TABLES”

1. The starting tag of a table is:

(A) <tr>

(B) <table>

(C) <input type="table">

(D) <tablet>

Level of difficulty: **Easy**

1. The starting tag of a table is:

Answer

(B) **<table>**

`<table class="schedule">`

Level of difficulty: **Easy**

2. In HTML tables, a table row is defined by

(A) <th>

(B) <tr>

(C) <td>

(D) <rowspan>

Level of difficulty: **Easy**

2. In HTML tables, a table row is defined by

Answer

(B) **<tr>**

<tr>

<th>6:00 PM</th>

<td colspan="7">National News</td>

</tr>

Level of difficulty: **Easy**

3. In HTML tables, a table header is defined by

- (a) **<th>**
- (b) **<tr>**
- (c) **<td>**
- (d) **<head>**

Level of difficulty: **Easy**

3. In HTML tables, a table header is defined by

Answer

(a) **<th>**

```
<tr>
  <th>Time</th>
  <th>Mon</th>
  ...
```

Level of difficulty: **Easy**

4. If you want to merge two or more rows in a table, which attribute can you use?

- (a) **<colmerge>**
- (b) **<rowmerge>**
- (c) **<colspan>**
- (d) **<rowspan>**

Level of difficulty: **Easy**

4. If you want to merge two or more rows in a table, which attribute can you use?

Answer

(D) <rowspan>

```
<tr>
```

```
  <th>9:00 PM</th>
```

```
  <td rowspan="2">Open Mike Nite</td>
```

```
<tr>
```

Level of difficulty: **Easy**

5. The content inside a `<td>` element is left aligned by default.

TRUE or FALSE

Level of difficulty: **Challenge**

5. The content inside a `<td>` element is left aligned by default.

TRUE or FALSE

Answer

TRUE

Level of difficulty: **Challenge**

6. If you do not require a table border, use

- (a) border = false**
- (b) border = no border**
- (c) border = "1"**
- (d) border = "0"**

Level of difficulty: **Challenge**

6. If you do not require a table border, use

Answer

(d) **border = "0"**

Preferred method : Using CSS

```
table, tr, td {  
    border:none;  
}
```

Level of difficulty: **Challenge**

7. In HTML tables, header data is automatically _____

- (a) centered**
- (b) centered and bolded**
- (c) bolded**
- (d) left-justified and italicized**

Level of difficulty: **Challenge**

7. In HTML tables, header data is automatically _____

Answer

(b) centered and bolded

Level of difficulty: **Challenge**

8. In HTML tables, to merge two or more columns into a single cell, use the _____ attribute.

(a) **<spancols>**

(b) **<rowspan>**

(c) **<colspan>**

(d) **<name>**

Level of difficulty: **Challenge**

8. In HTML tables, to merge two or more columns into a single cell, use the _____ attribute.

Answer

(c) **<colspan>**

```
<tr>
```

```
  <th>6:30 PM</th>
```

```
  <td colspan="7">World News</td>
```

```
</tr>
```

Level of difficulty: **Challenge**

9. In HTML tables, use the _____ tag to serve as a title or explanation.

(a) **<title>**

(b) **<explain>**

(c) **<text>**

(d) **<caption>**

Level of difficulty: **Challenge**

9. In HTML tables, use the _____ tag to serve as a title or explanation.

Answer

(d) **<caption>**

```
<table class="schedule">  
  <caption>All Times Central</caption>
```

Level of difficulty: **Challenge**

10. The three elements for separating the head, body and footer section of a table are ?

- (a) **<head>, <body>, <footer>**
- (b) **<thead>, <tbody>, <tfooter>**
- (c) **<thead>, <tbody>, <tfoot>**
- (d) **<th>, <tb>, <tf>**

Level of difficulty: **Challenge**

10. The three elements for separating the head, body and footer section of a table are ?

Answer

(c) <thead>, <tbody>, <tfoot>

Level of difficulty: **Challenge**

**11. Tables do not have borders by default.
TRUE or FALSE**

Level of difficulty: **Challenge**

11. Tables do not have borders by default. TRUE or FALSE

Answer

TRUE

```
table.schedule th, table.schedule td {  
  border: 1px solid gray;  
  padding: 5px;  
  vertical-align: top;  
}
```

Level of difficulty: **Challenge**

12. The following CSS code will add a 1-pixel border to the table and 10-pixels of padding to its cells when you add the _____ property.

```
table,th,td {  
  border: 1px solid black;  
}  
th,td {  
  _____: 10px;  
}
```

- (a) **spacing**
- (b) **padding**
- (c) **width**
- (d) **padCell**

12. The following CSS code will add a 1-pixel border to the table and 10-pixels of padding to its cells when you add the _____ property.

```
table,th,td {  
  border: 1px solid black;  
}  
th,td {  
  _____: 10px;  
}
```

Answer

(b) padding

**13. When adding a caption to a table,
the <caption> element must be placed
directly below the opening <table> tag.**

TRUE or FALSE

Level of difficulty: **Challenge**

13. When adding a caption to a table, the <caption> element must be placed directly below the opening <table> tag.

TRUE or FALSE

Answer

TRUE

```
<table class="schedule">  
  <caption>All Times Central</caption>
```

Level of difficulty: **Challenge**

14. By default, a caption appears at the bottom of the table.

TRUE or FALSE

Level of difficulty: **Challenge**

14. By default, a caption appears at the bottom of the table.
TRUE or FALSE

Answer

FALSE

By default, a **table caption** will be **center-aligned** above a **table**. However, the CSS properties `text-align` and `caption-side` can be used to align and place the caption.

Level of difficulty: **Challenge**

15. You can change a captions position to bottom by using the _____ CSS property?

- (a) caption
- (b) bottom
- (c) caption-bottom
- (d) caption-side

Level of difficulty: **Challenge**

15. You can change a captions position to bottom by using the _____ CSS property?

Answer

(d) **caption-side**

i.e. `caption {
 caption-side: bottom;
}`

Level of difficulty: **Challenge**

16. In HTML5, the `<tfoot>` element can be placed either before or after the `<tbody>` element, but must appear after any `<caption>`, `<colgroup>` and `<thead>` elements.

TRUE or FALSE

Level of difficulty: **SUPER challenge**

16. In HTML5, the `<tfoot>` element can be placed either before or after the `<tbody>` element, but must appear after any `<caption>`, `<colgroup>` and `<thead>` elements.

TRUE or FALSE

Answer

TRUE

Level of difficulty: **SUPER** challenge

17. The _____ tag is used to specify a group of one or more columns in a table for formatting.

- (a) **<group >**
- (b) **<groupCols>**
- (c) **<col>**
- (d) **<colgroup>**

Level of difficulty: **SUPER challenge**

17. The _____ tag is used to specify a group of one or more columns in a table for formatting.

Answer

(d) **<colgroup>**

<colgroup>

<col id="firstCol" />

<col class="dayCols" span="7" />

</colgroup>

Level of difficulty: **SUPER challenge**

18. The ____ tag is used to specify properties for each column within a <colgroup> element.

- (a) **<group>**
- (b) **<groupCols>**
- (c) **<col>**
- (d) **<colgroup>**

Level of difficulty: **SUPER challenge**

18. The ____ tag is used to specify properties for each column within a **<colgroup>** element.

Answer

(c) **<col>**

```
<colgroup>
  <col id="firstCol" />
  <col class="dayCols" span="7" />
</colgroup>
```

Level of difficulty: **SUPER challenge**

19. The `<thead>`, `<tbody>` and `<tfoot>` elements
MUST have at least one `<tr>` tag.

TRUE or FALSE

Level of difficulty: **SUPER-DUPER challenge**

19. The <thead>, <tbody> and <tfoot> elements
MUST have at least one <tr> tag.

TRUE or FALSE

Answer

TRUE

Level of difficulty: **SUPER-DUPER challenge**

20. The <thead>, <tbody> and <tfoot> elements are "normal" elements, which means none of them will affect the layout of the table.

TRUE or FALSE

Level of difficulty: **SUPER-DUPER challenge**

20. The <thead>, <tbody> and <tfoot> elements are "normal" elements, which means none of them will affect the layout of the table.

TRUE or FALSE

Answer

TRUE

Level of difficulty: **SUPER-DUPER challenge**

21. You should not use HTML tables for page layout, they should be used for displaying _____ only.

- (a) images**
- (b) financial reports**
- (c) entire web sites**
- (d) data**

Level of difficulty: **SUPER-DUPER challenge**

21. You should not use HTML tables for page layout, they should be used for displaying _____ only.

Answer

(d) **data**

Level of difficulty: **SUPER-DUPER challenge**

22. A set of <table> and </table> opening and closing tags respectively are required to create the table shell.

TRUE or FALSE

Level of difficulty: **SUPER-DUPER challenge**

22. A set of <table> and </table> opening and closing tags respectively are required to create the table shell.

TRUE or FALSE

Answer

TRUE

Level of difficulty: **SUPER-DUPER challenge**

Closing Notes:

HTML tables are not always advisable

Despite being useful for presenting tabular data in web pages, HTML5 does not recommend tables for page layouts because:

1. When used as layout documents, tables may not render correctly to non-visual media *i.e.* screen readers, making it difficult for visually impaired users to navigate pages.
2. The table code could become harder to maintain since table layouts involve more complex HTML structures.
3. Tables, especially 'nested tables' (one or more tables placed in another table) ones could take longer to load on a web page.

... Closing Notes:

... HTML tables are not always advisable

4. Table created layout can hurt search engine optimization (SEO). Since search engines place a higher rating on content at the top of a web page *i.e.* navigation, headers, first paragraph content thus placing a much lower rating on the table data.
5. Tables are not automatically responsive since they are sized according to their content. Viewing HTML table layouts on mobile devices may be very difficult to read.
